**Subject:** RE: Letter requesting site workplan and acknowledgment.

- I am formally acknowledging the receipt of the attached letter.
- I understand the potential liability that exists should my firm cause a release of the sands.
- Please note that the LLC operating the contract on this site is Cheltenham Transportation, LLC
- I will be in touch shortly with the additional required information

**Subject:** Letter requesting site workplan and acknowledgment.

Hey Eric,

Attached are three documents. The first being the letter requesting and outlining the site plan as it pertains to the environmental protection. The next two are maps that indicate the fence, the sands, and the lights.

I am off the clock until 330 pm tomorrow. But will check my email for the updated maps soon after that (these maps include additional features and will end up being scaled for large ("D" sized printing).. I will have several files for you to look at and get started with your plans. Please note, I do not want you to submit

the map with the light poles already marked.... (you'll have this map to use as a guide.... But you'll have to add your locations for your submission, Just like you'll have to add other features.. I will give you a "clean" map for you to add your proposed locations.

If you have any questions regarding this, let me know. I'll certainly work through it with you.

Please confirm receipt of this email.

Thanks

Myles
